

Recombinant Full Length Human DYRK4 Protein, GST-tagged

Cat. No. DYRK4-4093HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human DYRK4 full-length ORF (NP_003836.1, 1 a.a. - 520 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	520 amino acids
Description	This gene encodes an enzyme that belongs to a conserved family of serine/threonine protein kinases. Members of this dual specificity kinase family are thought to function in the regulation of cell differentiation and proliferation, survival, and in development. Alternate splicing results in multiple transcript variants. Additional alternatively spliced transcript variants of this gene have been described, but their full-length nature is not known.
