

Recombinant Full Length Human EIF4EBP2 Protein, GST-tagged

Cat. No. EIF4EBP2-4294HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human EIF4EBP2 full-length ORF (AAH05057, 1 a.a. - 120 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	120 amino acids
Description	This gene encodes a member of the eukaryotic translation initiation factor 4E binding protein family. The gene products of this family bind eIF4E and inhibit translation initiation. However, insulin and other growth factors can release this inhibition via a phosphorylation-dependent disruption of their binding to eIF4E. Regulation of protein production through these gene products have been implicated in cell proliferation, cell differentiation and viral infection. [provided by RefSeq, Oct 2008]
