

# Recombinant Full Length Human LOC399886 Protein, GST-tagged

**Cat. No.** LOC399886-4910HF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                 |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Human FLJ41423 full-length ORF ( ADR83482.1, 1 a.a. - 167 a.a.) recombinant protein with GST-tag at N-terminal.                                                                 |
| <b>Species</b>          | Human                                                                                                                                                                           |
| <b>Source</b>           | In Vitro Cell Free System                                                                                                                                                       |
| <b>ProteinLength</b>    | 167 amino acids                                                                                                                                                                 |
| <b>Description</b>      | LOC399886 (Uncharacterized LOC399886) is an RNA Gene, and is affiliated with the ncRNA class.                                                                                   |
| <b>Molecular Mass</b>   | 18.4 kDa                                                                                                                                                                        |
| <b>AA Sequence</b>      | MAALSSRCPRSAAGPAYLQEAARSAHWASPLVPLRTFQSSLFSSGSFHSREEEEE<br>GVSLRLTALVGQGPVPLFLGSLFCAGCRQGSPVWSCGEPVPRRIWVTASVTPSPR<br>QALHPCSDSLDILKALHLLPAAFSPFIWVQVFAEPSNKESRGENDGGEEERESANIY |
| <b>Applications</b>     | Enzyme-linked Immunoabsorbent Assay<br>Western Blot (Recombinant protein)<br>Antibody Production<br>Protein Array                                                               |
| <b>Notes</b>            | Best use within three months from the date of receipt of this protein.                                                                                                          |

|                |                                                                          |
|----------------|--------------------------------------------------------------------------|
| <b>Storage</b> | Store at -80 centigrade. Aliquot to avoid repeated freezing and thawing. |
|----------------|--------------------------------------------------------------------------|

|                       |                                                                          |
|-----------------------|--------------------------------------------------------------------------|
| <b>Storage Buffer</b> | 50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer. |
|-----------------------|--------------------------------------------------------------------------|

## GENE INFORMATION

|                  |                                                              |
|------------------|--------------------------------------------------------------|
| <b>Gene Name</b> | LOC399886 uncharacterized LOC399886 [ Homo sapiens (human) ] |
|------------------|--------------------------------------------------------------|

|                        |           |
|------------------------|-----------|
| <b>Official Symbol</b> | LOC399886 |
|------------------------|-----------|

|                 |                                                |
|-----------------|------------------------------------------------|
| <b>Synonyms</b> | LOC399886; uncharacterized LOC399886; FLJ41423 |
|-----------------|------------------------------------------------|

|                |        |
|----------------|--------|
| <b>Gene ID</b> | 399886 |
