

Recombinant Full Length Human FZD4 Protein

Cat. No. FZD4-5077HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human FZD4 full-length ORF (NP_036325.2) recombinant protein without tag.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	164 amino acids
Description	This gene is a member of the frizzled gene family. Members of this family encode seven-transmembrane domain proteins that are receptors for the Wingless type MMTV integration site family of signaling proteins. Most frizzled receptors are coupled to the beta-catenin canonical signaling pathway. This protein may play a role as a positive regulator of the Wingless type MMTV integration site signaling pathway. A transcript variant retaining intronic sequence and encoding a shorter isoform has been described, however, its expression is not supported by other experimental evidence. [provided by RefSeq]
