

Recombinant Full Length Human HSPD1 Protein, GST-tagged

Cat. No. HSPD1-5652HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human HSPD1 full-length ORF (AAH02676.1, 1 a.a. - 573 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	573 amino acids
Description	This gene encodes a member of the chaperonin family. The encoded mitochondrial protein may function as a signaling molecule in the innate immune system. This protein is essential for the folding and assembly of newly imported proteins in the mitochondria. This gene is adjacent to a related family member and the region between the 2 genes functions as a bidirectional promoter. Two pseudogenes, both located on chromosome 8, have been associated with this gene. Two transcript variants encoding the same protein have been identified for this gene. Mutations associated with this gene cause autosomal recessive spastic paraplegia 13. [provided by RefSeq]
