

Recombinant Full Length Human GRIN1 Protein

Cat. No. GRIN1-5664HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human GRIN1 full-length ORF (AAI56098.1) recombinant protein without tag.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	419 amino acids
Description	The protein encoded by this gene is a critical subunit of N-methyl-D-aspartate receptors, members of the glutamate receptor channel superfamily which are heteromeric protein complexes with multiple subunits arranged to form a ligand-gated ion channel. These subunits play a key role in the plasticity of synapses, which is believed to underlie memory and learning. Cell-specific factors are thought to control expression of different isoforms, possibly contributing to the functional diversity of the subunits. Alternatively spliced transcript variants have been described. [provided by RefSeq]
