

Recombinant Full Length Human HTR3A Protein

Cat. No. HTR3A-5690HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human HTR3A full-length ORF (AAH02354.1) recombinant protein without tag.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	573 amino acids
Description	The product of this gene belongs to the ligand-gated ion channel receptor superfamily. This gene encodes subunit A of the type 3 receptor for 5-hydroxytryptamine (serotonin), a biogenic hormone that functions as a neurotransmitter, a hormone, and a mitogen. This receptor causes fast, depolarizing responses in neurons after activation. It appears that the heteromeric combination of A and B subunits is necessary to provide the full functional features of this receptor, since either subunit alone results in receptors with very low conductance and response amplitude. Alternatively spliced transcript variants encoding different isoforms have been identified. [provided by RefSeq]
