

# Recombinant Full Length Human MTF2 Protein, GST-tagged

**Cat. No.** MTF2-6498HF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| <b>Description</b>      | MTF2 (Metal Response Element Binding Transcription Factor 2) is a Protein Coding gene. Among its related pathways are Mesodermal Commitment Pathway and Interactome of polycomb repressive complex 2 (PRC2). GO annotations related to this gene include methylated histone binding. An important paralog of this gene is PHF19.                                                                                                                                                           |
| <b>Molecular Mass</b>   | 84.7 kDa                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

LQTQNSEIVKDDEGKEDYQFDELNTEILNNLADQELQLNHLKNSITSYFGAAGRIACG  
EKYRVLARRVTLDGKVQYLVEWEGATAS

**Applications**

Enzyme-linked Immunoabsorbent Assay  
Western Blot (Recombinant protein)  
Antibody Production  
Protein Array

**Notes**

Best use within three months from the date of receipt of this protein.

**Storage**

Store at -80 centigrade. Aliquot to avoid repeated freezing and thawing.

**Storage Buffer**

50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.

## GENE INFORMATION

**Gene Name**

MTF2 metal response element binding transcription factor 2 [ Homo sapiens ]

**Official Symbol**

MTF2

**Synonyms**

MTF2; metal response element binding transcription factor 2; metal-response element-binding transcription factor 2; M96; PCL2; polycomb like 2; hPCL2; polycomb-like 2; polycomb-like protein 2; putative DNA binding protein; metal regulatory transcription factor 2; metal-response element DNA-binding protein M96; metal response element-binding transcription factor 2; dJ976O13.2; RP5-976O13.1;

**Gene ID**

22823

**mRNA Refseq**

NM\_001164391

**Protein Refseq**

NP\_001157863
