

Active GMP Recombinant Human IL21 Protein

Cat. No. IL21-01HG **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human IL21 protein, was expressed in CHO-K1 cell-derived in an animal component free process under cGMP guidelines.
Species	Human

Description	This gene encodes a member of the common-gamma chain family of cytokines with immunoregulatory activity. The encoded protein plays a role in both the innate and adaptive immune responses by inducing the differentiation, proliferation and activity of multiple target cells including macrophages, natural killer cells, B cells and cytotoxic T cells. Dysregulation of this gene plays a role in multiple immune-mediated diseases including lupus, psoriasis and chronic inflammatory diseases. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene.
