| <b>ProteinLength</b>        | 38-667 a.a.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>Description</b>          | <p>The protein encoded by this gene belongs to the subtilisin-like proprotein convertase family. The members of this family are proprotein convertases that process latent precursor proteins into their biologically active products. This encoded protein is a calcium-dependent serine endoprotease. It is structurally related to its family members, PACE and PACE4. This protein is concentrated in the trans-Golgi network, associated with the membranes, and is not secreted. It can process proalbumin and is thought to be responsible for the activation of HIV envelope glycoproteins gp160 and gp140. This gene has been implicated in the transcriptional regulation of housekeeping genes. Multiple alternatively spliced transcripts are described for this gene but their full length nature is not yet known. Downstream of this gene's map location at 11q23-q24, nucleotides that match part of this gene's 3' end are duplicated and inverted. A translocation breakpoint associated with lymphoma occurs between this gene and its inverted counterpart.</p> |
| <b>Predicted N Terminal</b> | Leu38 & His tag                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

|                       |                                                                                                                                                                                               |
|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Form</b>           | Supplied as a 0.2 µ filtered solution in Tris, NaCl, CaCl <sub>2</sub> and Glycerol.                                                                                                          |
| <b>Bio-activity</b>   | Measured by its ability to cleave the fluorogenic peptide substrate pERTKR-AMC.<br>The specific activity is >125 pmol/min/g, as measured under the described conditions.                      |
| <b>Molecular Mass</b> | 70 kDa (pro form) & 59 kDa (mature form), SDS-PAGE:79 kDa, reducing conditions.                                                                                                               |
| <b>Endotoxin</b>      | < 1.0 EU per 1 µg of the protein by the LAL method.                                                                                                                                           |
| <b>Purity</b>         | >95%, by SDS-PAGE under reducing conditions and visualized by silver stain.                                                                                                                   |
| <b>Storage</b>        | Use a manual defrost freezer and avoid repeated freeze-thaw cycles. 6 months from date of receipt, -20 to -70 °C as supplied. 3 months, -20 to -70 °C under sterile conditions after opening. |

| <b>Gene Name</b>       | PCSK7 proprotein convertase subtilisin/kexin type 7 [ Homo sapiens(human) ]                                                                                                                                                                                                                       |
| <b>Official Symbol</b> | PCSK7                                                                                                                                                                                                                                                                                             |
| <b>Synonyms</b>        | PCSK7; LPC; PC7; PC8; SPC7; proprotein convertase subtilisin/kexin type 7; hPC8; prohormone convertase 7; proprotein convertase 7; proprotein convertase 8; prohormone convertase PC7; proprotein convertase PC7; lymphoma proprotein convertase; subtilisin/kexin-like protease PC7; EC 3.4.21.- |
| <b>Gene ID</b>         | 9159                                                                                                                                                                                                                                                                                              |
| <b>mRNA Refseq</b>     | NM_004716                                                                                                                                                                                                                                                                                         |
| <b>Protein Refseq</b>  | NP_004707                                                                                                                                                                                                                                                                                         |
