Active Native Human Antistreptolysin O

Cat. No. ASO-153H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	
Species	Human
Source	Human Plasma
Description	Streptolysin is a hemolysin produced by group A streptococci. In an infected individual streptolysin O acts as a protein antigen, and the patient mounts an antibody response. A rise in anti-streptolysin O level begins about 1 week after infection and peaks 2-3 weeks later. In the absence of complications or reinfection, the anti-streptolysin O ASO titer will usually fall to preinfection levels within 6-12 months. Both clinical and laboratory findings should be correlated in reaching a diagnosis.
Form	Liquid - 0.2 micron filtered, 0.09% Sodium Azide
Bio-activity	>500 IU/mL (Beckman Array)
Storage	2-8 centigrade.
Concentration	>3 g/dL (Biuret)
