Cat. No. CUL4A-04H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human CUL4A/RBX1 Complex Protein, His-Tagged was expressed in sf21 cell
Species	Human
Source	Sf21 Cells
Description	Cullin-4A (CUL4A) is a core component of multiple cullin-RING type E3 Ubiquitin ligase complexes that mediate the ubiquitination of proteins involved in cell cycle progression, DNA repair and other processes. In the DCX complex (DDB1-CUL4-X-box) CUL4A serves as a scaffold that organizes the DDB1-X-box recognition subunits with the RBX1 subunit and contributes to catalysis through positioning of the substrate and an E2 ubiquitin-conjugating enzyme. In vivo, the E3 ubiquitin ligase activity of the DCX complex is dependent on neddylation of the cullin subunit, though neddylation may be dispensable for some in vitro reactions. This complex consists of an N-terminal 10-His tagged CUL4A and an untagged RBX1. CUL4A is neddylated in this complex.
Bio-activity	Typical enzyme concentration to support in vitro conjugation will depend on experimental conditions.
Molecular Mass	95 kDa (CUL4A), 12 kDa (RBX1)
Purity	>85%, by SDS-PAGE under reducing conditions and visualized by Colloidal
