

Active Recombinant Human PARP1 Protein, MYC/His-Tagged

Cat. No. PARP1-03H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Human PARP1 Protein, MYC/His-Tagged was expressed in Sf21 insect cells.
Species	Human
Source	Sf21 Cells
Description	This gene encodes a chromatin-associated enzyme, poly(ADP-ribosyl)transferase, which modifies various nuclear proteins by poly(ADP-ribosyl)ation. The modification is dependent on DNA and is involved in the regulation of various important cellular processes such as differentiation, proliferation, and tumor transformation and also in the regulation of the molecular events involved in the recovery of cell from DNA damage. In addition, this enzyme may be the site of mutation in Fanconi anemia, and may participate in the pathophysiology of type I diabetes.
Form	Liquid
Bio-activity	≥1'200U/mg protein.
