

Native Human Menopausal Gonadotropin

Cat. No. MG-202H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Purified Native Human Serum High Density Lipoprotein.
Species	Human
Source	Post-Menopausal Human Urine
Description	Gonadotropins (or glycoprotein hormones) are protein hormones secreted by gonadotrope cells of the anterior pituitary of vertebrates. This is a family of proteins, which include the mammalian hormones Follicle-stimulating hormone (FSH), Luteinizing hormone (LH), placental chorionic gonadotropins hCG and eCG and chorionic gonadotropin (CG), as well as at least two forms of fish gonadotropins. These hormones are central to the complex endocrine system that regulates normal growth, sexual development, and reproductive function. The hormones LH and FSH are secreted by the anterior pituitary gland, while hCG and eCG are secreted by the placenta
Form	White-Yellow Powder
Storage	Store at 2-8 °C.
