

Recombinant Human SPARC Protein, His-Tagged

Cat. No. SPARC-01H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human SPARC Protein, His-Tagged was expressed in Baculovirus cell line.
Species	Human
Source	Insect Cells
ProteinLength	295aa
Description	This gene encodes a cysteine-rich acidic matrix-associated protein. The encoded protein is required for the collagen in bone to become calcified but is also involved in extracellular matrix synthesis and promotion of changes to cell shape. The gene product has been associated with tumor suppression but has also been correlated with metastasis based on changes to cell shape which can promote tumor cell invasion. Three transcript variants encoding different isoforms have been found for this gene.
Form	Liquid
Molecular Mass	33.8 kDa
