

Native Human Proteinase 3

Cat. No. PRTN3-242H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Purified Native Human Azurophil Granules Proteinase 3
Species	Human
Source	Human Azurophil Granules
Description	Recent studies show a potential role for the serine protease PR3 in determining mortality and incidence of heart failure following AMI. PRTN3 is a serine protease enzyme expressed mainly in neutrophil granulocytes. In human neutrophils proteinase 3 contributes to the proteolytic generation of antimicrobial peptides. PR3 is also the epitope of anti-neutrophil cytoplasmic antibodies (ANCA) of the cANCA (cytoplasmic subtype) class, as the major autoantigen of c-ANCA and is strongly expressed in lung tissue of patients with Wegener's granulomatosis.
Form	Liquid
Molecular Mass	29000
Purity	>96% by SDS-PAGE
Storage	Below -20 °C, Avoid repeat freeze-thaws.
