

Recombinant Human TNFSF13B Protein

Cat. No. TNFSF13B-256H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human TNFSF13B Protein without tag was expressed in E. coli.
Species	Human
Source	E.coli
Description	B cell-activating factor (BAFF), or B lymphocyte stimulator (BLyS), is a type II member of the tumor necrosis factor (TNF) superfamily. BAFF is expressed as a transmembrane protein on T cells, macrophages, and dendritic cells. The transmembrane domain of BAFF can also be cleaved to produce a soluble protein fragment. BAFF binds to the TNF receptors known as B cell maturation antigen (BCMA), transmembrane activator and CAML interactor (TACI), and BAFF receptor (BAFFR). BAFF is important for the survival and maturation of peripheral B cells. Human BAFF shows activity on mouse splenocytes.
Bio-activity	No biological activity data is available at this time.
