

Recombinant Human CD276 Protein, His\Avi-tagged

Cat. No. CD276-174H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Biotinylated Recombinant Human CD276/B7-H3 (C-Avi-His) is produced by Human Cells. The target gene encoding leu29-pro245 is expressed with a C-Avi-His tag.
Species	Human
Source	Human Cells
ProteinLength	29-245 a.a.
Description	B7 homolog 3 (B7-H3), a member of the immunoglobulin superfamily, is also known CD276, which contains two Ig-like C2-type (immunoglobulin-like) domains and two Ig-like V-type (immunoglobulin-like) domains. B7-H3 may participate in the regulation of T-cell-mediated immune response. B7-H3 also plays a protective role in tumor cells by inhibiting natural-killer mediated cell lysis as well as a role of marker for detection of neuroblastoma cells. Furthermore, B7-H3 is involved in the development of acute and chronic transplant rejection and in the regulation of lymphocytic activity at mucosal surfaces. It could also play a key role in providing the placenta and fetus with a suitable immunological environment throughout pregnancy.
Form	Lyophilized from a 0.2 µm filtered solution of PBS, pH 7.4
AA Sequence	leu29-pro245
Endotoxin	Less than 0.1 ng/ug (1 EU/ug).
