

Recombinant Human CELA3A Protein (AA 18-270), C-His-Tagged

Cat. No. CELA3A-28H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human CELA3A Protein (AA 18-270) with a C-His tag was expressed in HEK293.
Species	Human
Source	HEK293
ProteinLength	AA 18-270
Description	Elastases form a subfamily of serine proteases that hydrolyze many proteins in addition to elastin. Humans have six elastase genes which encode the structurally similar proteins elastase 1, 2, 2A, 2B, 3A, and 3B. Unlike other elastases, elastase 3A has little elastolytic activity. Like most of the human elastases, elastase 3A is secreted from the pancreas as a zymogen and, like other serine proteases such as trypsin, chymotrypsin and kallikrein, it has a digestive function in the intestine. Elastase 3A preferentially cleaves proteins after alanine residues. Elastase 3A may also function in the intestinal transport and metabolism of cholesterol. Both elastase 3A and elastase 3B have been referred to as protease E and as elastase 1.
