

## Active Recombinant Cynomolgus OSMR protein, His-tagged, Low Endotoxin

**Cat. No.** OSMR-1297C    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                      |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Cynomolgus OSMR protein(A0A2K5UFW5)(28-737 aa), fused with C-terminal His tag, was expressed in HEK293.                                                                  |
| <b>Species</b>          | Cynomolgus                                                                                                                                                                           |
| <b>Source</b>           | HEK293                                                                                                                                                                               |
| <b>ProteinLength</b>    | 28-737 aa                                                                                                                                                                            |
| <b>Form</b>             | Lyophilized from 0.22 µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.                                                      |
| <b>Bio-activity</b>     | Immobilized Cynomolgus OSMR beta, His Tag at 2 µg/ml (100 µl/well) on the plate. Dose response curve for Anti-OSMR Antibody, hFc Tag with the EC50 of 8.4 ng/ml determined by ELISA. |
| <b>Molecular Mass</b>   | The protein has a predicted MW of 82.04 kDa. Due to glycosylation, the protein migrates to 110-130 kDa based on Bis-Tris PAGE result.                                                |
| <b>Endotoxin</b>        | Less than 0.01 EU per µg by the LAL method.                                                                                                                                          |
| <b>Purity</b>           | > 95% as determined by Bis-Tris PAGE; > 90% as determined by HPLC                                                                                                                    |
| <b>Storage</b>          | Store at -20 to -80°C for 12 months as supplied from date of receipt.-80°C for 3                                                                                                     |

months after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

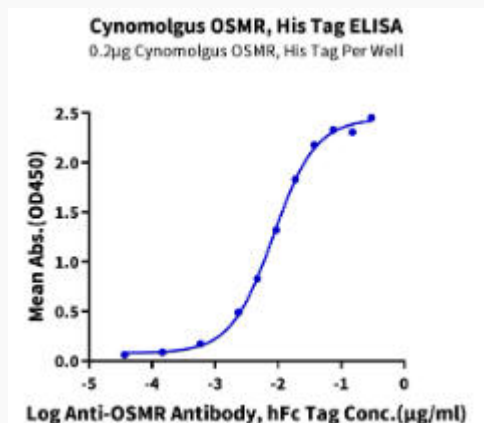

#### Reconstitution

Dissolve the lyophilized protein in distilled water.

#### Bis-Tris PAGE

#### ELISA Data
