

Recombinant Mouse Il6 Protein, His-tagged

Cat. No. Il6-214M **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Mouse Il6 Protein with His tag was expressed in E. coli.
Species	Mouse
Source	E.coli
Description	Acute phase response is induced by interleukin-6 (IL-6) produced by T cells, macrophages, fibroblasts, endothelial and other cells. IL-6 induces proliferation or differentiation in many cell types including B cells, thymocytes and T cells. IL-6, in concert with TGF-β, is important for developing Th17 responses. IL-6 binds to IL-6Rα and through this association induces gp130 homodimerization. gp130 homodimerization triggers the Jak/Stat cascade and the SHP-2/Erk MAP kinase cascade. IL-6 also forms a complex with an IL-6Rα splice variant that is nonmembrane-associated. The IL-6/soluble IL-6Rα complex can then activate the gp130 signaling pathway in cells that express gp130 but not IL-6Rα. Research studies have shown that IL-6, through increasing expression of proangiogenic VEGF, may also contribute to metastatic breast cancer.

Purity	Transferred into competent cells and the supernatant was purified by NI column affinity chromatography and the purity is > 85% (by SDS-PAGE).
Notes	For research use only, not for use in diagnostic procedure.
Storage	Store at 4 centigrade short term. Aliquot and store at -20 centigrade long term. Avoid freeze-thaw cycles.
Storage Buffer	PBS, 4M Urea, pH7.4

GENE INFORMATION

Gene Name	Il6 interleukin 6 [<i>Mus musculus</i> (house mouse)]
Official Symbol	Il6
Synonyms	Il6; interleukin 6; Il-6; interleukin-6; B-cell hybridoma growth factor; interleukin HP-1
Gene ID	16193
mRNA Refseq	NM_031168
Protein Refseq	NP_112445
UniProt ID	P08505
