

Recombinant Human GAPDH Protein, His-tagged

Cat. No. GAPDH-045H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human GAPDH Protein with His tag was expressed in E. coli.
Species	Human
Source	E.coli
Description	Glyceraldehyde-3-phosphate dehydrogenase (GAPDH) catalyzes the phosphorylation of glyceraldehyde-3-phosphate during glycolysis. Though differentially expressed from tissue to tissue, GAPDH is thought to be a constitutively expressed housekeeping protein. For this reason, GAPDH mRNA and protein levels are often measured as controls in experiments quantifying specific changes in expression of other targets. Recent work has elucidated roles for GAPDH in apoptosis, gene expression, and nuclear transport. GAPDH may also play a role in neurodegenerative pathologies such as Huntington and Alzheimer's diseases.
