

Recombinant Human CD180 Protein, C-His-tagged

Cat. No. CD180-096H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human CD180 Protein with C-His tag was expressed in E. coli.
Species	Human
Source	E.coli
Description	CD180/RP105 is a type-I transmembrane glycoprotein that is restricted to expression in mature B-cells. Research studies have shown that CD180 engages signaling cascades in mature B-cells that drive cell proliferation. Indeed, CD180 functions with TLR4 as an LPS receptor on B-cells and, upon binding LPS, transmits proliferation and survival signals that require the Vav family of guanine nucleotide exchange factors.
