

Recombinant Human DDR1 Protein, C-His-tagged

Cat. No. DDR1-143H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human DDR1 Protein with C-His tag was expressed in E. coli.
Species	Human
Source	E.coli
Description	The discoidin domain receptors (DDR) are receptor tyrosine kinases with a discoidin homology repeat in their extracellular domains, activated by binding to extracellular matrix collagens. So far, two mammalian DDRs have been identified: DDR1 and DDR2. They are widely expressed in human tissues and may have roles in smooth muscle cell-mediated collagen remodeling. Research studies have implicated aberrant expression and signaling of DDRs in human diseases related to increased matrix degradation and remodeling, such as cardiovascular disease, liver fibrosis, and tumor invasion.
