

# Recombinant Full Length Pseudomonas Aeruginosa Na(+)-Translocating Nadh-Quinone Reductase Subunit D Protein, His-Tagged

**Cat. No.** RFL22718PF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                              |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Pseudomonas aeruginosa Na(+)-translocating NADH-quinone reductase subunit D Protein (A6V3A0) (1-223aa), fused to N-terminal His tag, was expressed in E. coli.                                                       |
| <b>Species</b>          | Pseudomonas aeruginosa                                                                                                                                                                                                                       |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                       |
| <b>ProteinLength</b>    | Full Length (1-223)                                                                                                                                                                                                                          |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                                                                           |
| <b>AA Sequence</b>      | MAAQPTIREVLFPVPVFNQNNPIGLQILGICSALAVTSNLKTATVMAIALTLVTGFSNLFIS<br>MIRRQIPSSIRMIVQMVIASLVIVVDQVLKAYAYSLSKQLSVFVGLIITNCIVMGRAEA<br>FAMANPPLVSFFDGIGNGLGYSAMLLVLGFIRELFGAGKLYGISVLPTVNDGGWYQP<br>NGL LLLPPSAFFLIGLIWALRTWKKDQVEAPAYRMAPQVSSKEAY |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                                                  |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                                                                          |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid                                                                                                                                                            |

repeated freeze-thaw cycles.

**Storage Buffer**

Tris/PBS-based buffer, 6% Trehalose, pH 8.0

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

## GENE INFORMATION

**Gene Name**

nqrD

**Synonyms**

nqrD; PSPA7\_2163; Na(+)-translocating NADH-quinone reductase subunit D; Na(+)-NQR subunit D; Na(+)-translocating NQR subunit D; NQR complex subunit D; NQR-1 subunit D

**UniProt ID**

[A6V3A0](#)
