

# Recombinant Full Length Chlorobaculum Parvum Atp Synthase Subunit A 2(Atpb2) Protein, His-Tagged

**Cat. No.** RFL5786CF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                                            |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Chlorobaculum parvum ATP synthase subunit a 2(atpB2) Protein (B3QLV3) (27-350aa), fused to N-terminal His tag, was expressed in E. coli.                                                                                                                                                                                           |
| <b>Species</b>          | Chlorobaculum parvum                                                                                                                                                                                                                                                                                                                                       |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                                                                                                                     |
| <b>ProteinLength</b>    | Full Length of Mature Protein (27-350)                                                                                                                                                                                                                                                                                                                     |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                                                                                                                                                                                         |
| <b>AA Sequence</b>      | NPVQEDMSAHESLPAAAAPAEVHAPVEVHNAAGTHVETAHESAVEGHEEKAGDVI<br>MHHVQ DSNVLAPEPFGEIELPHLQLGSLDISITKHVMMWVAAVILILVGAAAGAGVK<br>KISVKQA PSGIANVMEALVDFIRLDVAKSNIGHGYEKHLPYLISVFFFILVCNLLGLIPY<br>GATATGN INVTLALSIFTFFITQIAAFKELGVGGYVKHLTAGTHWSLWIIMPIEIGQFT<br>KPVALT IRLFANMTAGHIIILSLIFISFILESYIVAAAVSVPFAIFIYLLLEIFVAFLQAFVFTM<br>LS ALFIGLATAHESHDSELEASGHH |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                                                                                                                                                                |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                                                                                                                                                                                        |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid                                                                                                                                                                                                                                                                          |

 45-1 Ramsey Road, Shirley, NY 11967, USA

repeated freeze-thaw cycles.

**Storage Buffer**

Tris/PBS-based buffer, 6% Trehalose, pH 8.0

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

## GENE INFORMATION

**Gene Name**

atpB2

**Synonyms**

atpB2; Cpar\_2052; ATP synthase subunit a 2; ATP synthase F0 sector subunit a 2; F-ATPase subunit 6 2

**UniProt ID**

[B3QLV3](#)
