

# Recombinant Full Length Salmonella Schwarzengrund Probable 4-Amino-4-Deoxy-L-Arabinose-Phosphoundecaprenol Flippase Subunit Arne(Arne) Protein, His-Tagged

**Cat. No.** RFL687SF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                           |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Salmonella schwarzengrund Probable 4-amino-4-deoxy-L-arabinose-phosphoundecaprenol flippase subunit ArnE(arnE) Protein (B4TPI5) (1-111aa), fused to N-terminal His tag, was expressed in E. coli. |
| <b>Species</b>          | Salmonella schwarzengrund                                                                                                                                                                                                 |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                    |
| <b>ProteinLength</b>    | Full Length (1-111)                                                                                                                                                                                                       |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                                                        |
| <b>AA Sequence</b>      | MIGVVLVLASLLSVGGQLCQKQATRPLTTGGRRRHLMLWLGLALICMGAAMVLWLL<br>VLQT LPVGIAYPMLSLNFVWVTLAAWKIWHEQVPPRHWLGVALIISGIILGSAA                                                                                                       |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                               |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                                                       |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid repeated freeze-thaw cycles.                                                                                                            |

|                         |                                                                                                                                                                                                                                                                                                                                                                                                             |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Storage Buffer</b>   | Tris/PBS-based buffer, 6% Trehalose, pH 8.0                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Reconstitution</b>   | We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference. |
| <b>GENE INFORMATION</b> |                                                                                                                                                                                                                                                                                                                                                                                                             |
