

Recombinant Human Growth Differentiation Factor 11

Cat. No. GDF11-242 Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant human GDF-11 produced in <i>E.coli</i> is a 25.0 kDa disulfide-linked homodimer containing two 109 amino acid polypeptide chains.
Species	Human
Source	E.coli
Description	GDF-11 is a myostatin-homologous protein that acts as an inhibitor of nerve tissue growth. GDF-11 has been shown to suppress neurogenesis through a myostatin-like pathway, which involves arrest of progenitor cell-cycle in the G1 phase. Similarities between myostatin and GDF-11, which are 90% identical in their amino acid sequence, suggests that the regulatory mechanisms responsible for maintaining proper tissue size during neural and muscular development might be the same.
Purity	> 98% by SDS-PAGE and HPLC analysis.
Endotoxin level	< 0.1 ng per µg of Galectin-1.
Stabilizer	None.
Formulation	Lyophilized.
Biologically Activity	The ED50 was determined by its ability to inhibit induced alkaline phosphatase production by ATDC-5 chondrogenic cells. The expected ED50 for this effect is 0.08-0.10 µg/ml.

Reconstitution The human GDF-11 should be reconstituted in water to a concentration of 0.1-1.0 mg/ml. This solution can be diluted into other aqueous buffers and stored at 4°C for one week or -20°C for future use.

Stability The lyophilized protein is stable for at least 2 years from date of receipt at -20°C. Reconstituted GDF-11 is stable for at least 3 months when stored in working aliquots with a carrier protein at -20°C. Avoid repeated freeze-thaw cycles.

GENE INFORMATION

Gene Name GDF11 growth differentiation factor 11 [Homo sapiens]

Synonyms GDF11; growth differentiation factor 11; BMP11; BMP-11; bone morphogenetic protein 11; GDF-11

Gene ID 10220

mRNA Refseq NM_005811

Protein Refseq NP_005802

MIM 603936

UniProt ID O95390

Chromosome Location 12q13.13

Function cytokine activity; growth factor activity; protein binding
