

Recombinant HBsAg

Cat. No. HBsAg-270H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	The E.Coli derived Recombinant Hepatitis B Surface Antigen preS1 is a single non-glycosylated polypeptide chain containing 119 amino acids and having a molecular weight of 12.6 kDa.
Species	HBV
Source	E.coli
Description	Hepatitis B virus (HBV) is a human pathogen, causing serious liver disease. The HBV surface protein antigens (HBsAg) are comprised of three carboxyl co terminal HBs proteins termed large (LHBs), middle (MHBs) and small (SHBs, also called major) protein. LHBs and MHBs also share the highly hydrophobic, repetitive, membrane spanning S domain. In addition, LHBs has a 119 amino acid region called preS1.
Form	HBsAg protein was lyophilized from 0.2µm filtered (1mg/ml) solution in 20mM PB, pH 7.4, and 50mM NaCl.
Molecular Mass	12.6 kDa
AA Sequence	MGGWSSKPRQGMGTNLSVPNPLGFFPDHQLDPAFGANSNNPDWDFNPNKDHWP EAHQVGAGAFGPGFTPPHGGLL GWSPQAQGILTTPVPAPPPASTNRQSGRQPTPI SPPLRDSHPQA.
Purity	HBsAg Protein is >95% pure as determined by 10% PAGE (coomassie staining).

Applications	1. Immunochromatography (capture and conjugate).2. Preparing monoclonal or polyclonal antibodies for HBsAg-preS1.3. ELISA.
Storage	This lyophilized HBsAg preparation is stable at 2-8°C, but should be kept at -20°C for long term storage, preferably desiccated. Upon reconstitution, the preparation is stable for up to one week at 2-8°C. For maximal stability, apportion the reconstituted
Reconstitution	Reconstitute in sterile distilled water or aqueous buffer containing 0.1% BSA to a concentration of 0.1-1.0 mg/mL.
