

# Recombinant Full Length *Teredinibacter Turnerae* Na(+)-Translocating Nadh-Quinone Reductase Subunit E Protein, His-Tagged

**Cat. No.** RFL19161TF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                              |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length <i>Teredinibacter turnerae</i> Na(+)-translocating NADH-quinone reductase subunit E Protein (C5BII5) (1-202aa), fused to N-terminal His tag, was expressed in <i>E. coli</i> .                       |
| <b>Species</b>          | <i>Teredinibacter turnerae</i>                                                                                                                                                                                               |
| <b>Source</b>           | <i>E.coli</i>                                                                                                                                                                                                                |
| <b>ProteinLength</b>    | Full Length (1-202)                                                                                                                                                                                                          |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                                                           |
| <b>AA Sequence</b>      | MADLIALFVRSVFIENMALAFFLGMCTFLAVSKKVDAAIGLGVAVVVVQTVTPVNNL<br>LY TYFLADGALAWAGLPNVDL SFLGLITYIGVIAALVQIMEMFLDRYVPALYNALGVFL<br>PLI TVNCAIMGGS LFMVERDYNFAESVVF GTGSGFGWALAITALAGIREKMKYSDVP<br>EGLQGL GITFIVVGLMSLGFM SFGGISL |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                                  |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                                                          |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid                                                                                                                                            |

repeated freeze-thaw cycles.

**Storage Buffer**

Tris/PBS-based buffer, 6% Trehalose, pH 8.0

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

**GENE INFORMATION****Gene Name**

nqrE

**Synonyms**

nqrE; TERTU\_1953; Na(+)-translocating NADH-quinone reductase subunit E; Na(+)-NQR subunit E; Na(+)-translocating NQR subunit E; NQR complex subunit E; NQR-1 subunit E

**UniProt ID**
