

Recombinant Human PLIN2, T7 tagged

Cat. No. PLIN2-201H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	PLIN2, 1-437aa, Human, T7 tag, E.coli
Species	Human
Source	E.coli
ProteinLength	1-437aa
Description	PLIN2 belongs to the perilipin family, members of which coat intracellular lipid storage droplets. This protein is associated with the lipid globule surface membrane material, and maybe involved in development and maintenance of adipose tissue. However, it is not restricted to adipocytes as previously thought, but is found in a wide range of cultured cell lines, including fibroblasts, endothelial and epithelial cells, and tissues, such as lactating mammary gland, adrenal cortex, Sertoli and Leydig cells, and hepatocytes in alcoholic liver cirrhosis, suggesting that it may serve as a marker of lipid accumulation in diverse cell types and diseases. Recombinant human PLIN2, fused to T7-tag at N-terminus, was expressed in E.coli.
