

Native Human Fibrinogen

Cat. No. FG-116H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Native Human Fibrinogen was purified from human plasma.
Species	Human
Source	Human Plasma
Description	Fibronectin is a 340kDa glycoprotein involved in cell adhesion and migration processes including embryogenesis, metastasis, wound healing, blood coagulation and host immunity. It consists of a dimer, each part made up of three disulphide linked polypeptides known as the alpha, beta and gamma chains
Form	liquid. Citrate buffered saline.
Molecular Mass	340 kD
Purity	35-65% protein, of which $\geq 90\%$ clottable protein. Virtually free from plasminogen and plasmin.
Applications	E; FN
Storage	Store at -20°C only. Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the protein.
Concentration	1.25 mg/ml fibrinogen
