

# Recombinant Full Length Arabidopsis Thaliana Ring-H2 Finger Protein Atl29(Atl29) Protein, His-Tagged

**Cat. No.** RFL879AF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                          |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Arabidopsis thaliana RING-H2 finger protein ATL29(ATL29) Protein (O49691) (1-289aa), fused to N-terminal His tag, was expressed in E. coli.                                                                                                                                                      |
| <b>Species</b>          | Arabidopsis thaliana                                                                                                                                                                                                                                                                                                     |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                                                                                   |
| <b>ProteinLength</b>    | Full Length (1-289)                                                                                                                                                                                                                                                                                                      |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                                                                                                                                                       |
| <b>AA Sequence</b>      | MSTIIPSPLAPQPPQQHYPPLTVILTVILLVFFFIGFFTLYFCKCFLDTMVQAWRLHH<br>GGDTVSDNPLQQPEAPPVNPGLLELRINSFPTFPYSSVKDLREEKYGLECAICLLEFD<br>GD HVLRLLTTCYHVFHQECIDLWFESHRTCPVCRRDLDP PPPPENTKPTVDEMIIDV<br>IQETS DDEEDDHHRQQTTTQIDTWPSSGQTSSIKKEQNLPEKFSRSHSTGHSIVRN<br>KPEEEDKYT LRLPEHV KIKVTRGHSQTESCVTFAELIRNRGYDHRRFGEVSGQTQS<br>KN |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                                                                                                                              |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                                                                                                                                                      |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid                                                                                                                                                                                                                                        |

repeated freeze-thaw cycles.

**Storage Buffer**

Tris/PBS-based buffer, 6% Trehalose, pH 8.0

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

## GENE INFORMATION

**Gene Name**

ATL29

**Synonyms**

ATL29; At4g17920; T6K21.100; RING-H2 finger protein ATL29; RING-type E3 ubiquitin transferase ATL29

**UniProt ID**

[O49691](#)
