

# Recombinant Full Length Oenothera Parviflora Photosystem Q(B) Protein Protein, His-Tagged

**Cat. No.** RFL22674OF **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                                                             |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Oenothera parviflora Photosystem Q(B) protein Protein (B0Z5A8) (1-344aa), fused to N-terminal His tag, was expressed in E. coli.                                                                                                                                                                                                                    |
| <b>Species</b>          | Oenothera parviflora (Small-flowered evening primrose) (Oenothera cruciata)                                                                                                                                                                                                                                                                                                 |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                                                                                                                                      |
| <b>ProteinLength</b>    | Full Length (1-344)                                                                                                                                                                                                                                                                                                                                                         |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                                                                                                                                                                                                          |
| <b>AA Sequence</b>      | MTAILERRESESLWGRFCNWITSTENRLYIGWFGVLMIPTLLTATSVFIIAFIAAPPVDI<br>DGIREPVSGSLLYGNNISGAIPTSAAGLHFYPIWEAASVDEWLYNGGPYELIVLHFL<br>LGVACYMGREWELSFRLGMRPWIAVAYSAPVAAATAVFLIYPIGQGSFSDGMPLGIS<br>GTF NFMIVFQAEHNILMHPFHMLGVAGVFGGSLFSAMHGSLVTSSLIRETTENESAN<br>EGYRFG QEEETYNIVAAHGYFGRLIFQYASFNNRSRLHFFLAAWPVVGIWFTALGIS<br>TMAFNLNGF NFNQSVVDSQGRVINTWADIINRANLGMEVMHERNAHNFPDLA |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                                                                                                                                                                                 |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                                                                                                                                                                                                         |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid                                                                                                                                                                                                                                                                                           |

repeated freeze-thaw cycles.

**Storage Buffer**

Tris/PBS-based buffer, 6% Trehalose, pH 8.0

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

**GENE INFORMATION****Gene Name**

psbA

**Synonyms**

psbA; Photosystem II protein D1; PSII D1 protein; Photosystem II Q(B protein

**UniProt ID**

[B0Z5A8](#)
