

# Recombinant Full Length Neosartorya Fumigata Probable Endonuclease Lcl3(Lcl3) Protein, His-Tagged

**Cat. No.** RFL1078NF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                  |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Neosartorya fumigata Probable endonuclease lcl3(lcl3) Protein (BOXMZ5) (1-296aa), fused to N-terminal His tag, was expressed in E. coli.                                                                                                                                                                 |
| <b>Species</b>          | Neosartorya fumigata                                                                                                                                                                                                                                                                                                             |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                                                                                           |
| <b>ProteinLength</b>    | Full Length (1-296)                                                                                                                                                                                                                                                                                                              |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                                                                                                                                                               |
| <b>AA Sequence</b>      | MRWPPWASDTQAQQQSRKSSSEDDERQAAASSTTTSKKKDWESSVTAIDWAAFT<br>EARTII PTLILTSGFLGAFYIHRRYLRRFPDAVSITPSYFRRRSLLGQVTSVGDGDNFR<br>IYHTPGG RLAGWGWLPWKKIPTSKKELRDKTVHIRLAGIDAPELAHFGRPEQPFAR<br>EAHQWLTSYLF GRRVRAYIHRPDQYQRAVASVYVRLLDFPPFRRRDVSYEMLKR<br>GLATVYEAKIGAEFGG EAMERKYKKA EWWAKLRGVGLWKDYRRNKTKWESP<br>REY KTRMGLEEAQPGVEIKK |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                                                                                                                                      |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                                                                                                                                                              |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid                                                                                                                                                                                                                                                |

repeated freeze-thaw cycles.

**Storage Buffer**

Tris/PBS-based buffer, 6% Trehalose, pH 8.0

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

**GENE INFORMATION****Gene Name**

lcl3

**Synonyms**

lcl3; AFUB\_003840; Probable endonuclease lcl3

**UniProt ID**
