

# Recombinant Full Length Shigella Flexneri Serotype 5B Upf0208 Membrane Protein Yfbv(Yfbv) Protein, His-Tagged

**Cat. No.** RFL19553SF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                              |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Shigella flexneri serotype 5b UPF0208 membrane protein YfbV(yfbV) Protein (Q0T2J2) (1-151aa), fused to N-terminal His tag, was expressed in E. coli. |
| <b>Species</b>          | Shigella flexneri serotype 5b                                                                                                                                                |
| <b>Source</b>           | E.coli                                                                                                                                                                       |
| <b>ProteinLength</b>    | Full Length (1-151)                                                                                                                                                          |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                           |
| <b>AA Sequence</b>      | MSTPDNRSVNFFSLFRRGQHYSKTWPLEKRLAPVFVENRVIKMTRYAIRFMPPIAVF<br>TLC WQIALGGLLGPVATALFALS LPMQGLWWLGKRSVTPLPPAILNWFYEV RGKL<br>QESGQVL APVEGKPDYQALADTLKRAFKQLDKTFLDDL           |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                  |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                          |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid repeated freeze-thaw cycles.                                                               |

|                       |                                             |
|-----------------------|---------------------------------------------|
| <b>Storage Buffer</b> | Tris/PBS-based buffer, 6% Trehalose, pH 8.0 |
|-----------------------|---------------------------------------------|

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

**GENE INFORMATION****Gene Name**

yfbV

**Synonyms**

yfbV; SFV\_2362; UPF0208 membrane protein YfbV
