

# Recombinant Full Length Burkholderia Xenovorans Undecaprenyl-Diphosphatase 1(Uppp1) Protein, His-Tagged

**Cat. No.** RFL10180PF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                            |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Burkholderia xenovorans Undecaprenyl-diphosphatase 1(uppP1) Protein (Q13V13) (1-278aa), fused to N-terminal His tag, was expressed in E. coli.                                                                                                                                     |
| <b>Species</b>          | Paraburkholderia xenovorans                                                                                                                                                                                                                                                                                |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                                                                     |
| <b>ProteinLength</b>    | Full Length (1-278)                                                                                                                                                                                                                                                                                        |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                                                                                                                                         |
| <b>AA Sequence</b>      | MDWLLACKALILGVVEGLTEFLPVSSSTGHLIVAGSLLNFTDEHAKTFDVIQLGAILAV<br>C WEYRRRIGSVVSGGLPSRPDARRFTLNVIATIPAIVLGLLFEKTIKAALFSPVPVAFAL<br>V AGGVVILWAESRQRTRGETVARVQNVDLGDALKVGLAQCFALIPGMSRSGS<br>TIIGGM LFGLDRRVATEFSFFLAIPFIIFGATAYELHKDWHLLSVDALGTFALGFVAAFV<br>SAFACVR WLLRYIAAHDFATAFAWYRIGFGLLILLVGYS GALNWTE |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                                                                                                                |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                                                                                                                                        |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid                                                                                                                                                                                                                          |

repeated freeze-thaw cycles.

**Storage Buffer**

Tris/PBS-based buffer, 6% Trehalose, pH 8.0

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

**GENE INFORMATION****Gene Name**

uppP1

**Synonyms**

uppP1; Bxeno\_A3538; Bxe\_A0858; Undecaprenyl-diphosphatase 1; Bacitracin resistance protein 1; Undecaprenyl pyrophosphate phosphatase 1

**UniProt ID**
