

# Recombinant Full Length Staphylococcus Aureus Membrane Protein Insertase Yidc(YidC) Protein, His-Tagged

**Cat. No.** RFL19039SF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                    |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Staphylococcus aureus Membrane protein insertase YidC(yidC) Protein (Q2YUI9) (20-290aa), fused to N-terminal His tag, was expressed in E. coli.                                                                                                                            |
| <b>Species</b>          | Staphylococcus aureus                                                                                                                                                                                                                                                                              |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                                                             |
| <b>ProteinLength</b>    | Full Length of Mature Protein (20-290)                                                                                                                                                                                                                                                             |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                                                                                                                                 |
| <b>AA Sequence</b>      | CDYSKPEKRSGFFYNTFVDPMKNVLDWLGNNLLNDNYGLAIILVLVIRIILLPFMLSNY<br>KNSHMMRQKMVKVAKPEVEKIQEKVKRARTQEEKMAANQELMQVYKKYDMNPIKSM<br>LGCLP MLIQLPIIMGLYFVLKDQLVDGLFKYPHFLWFDLGRPDIWITIAGVLYFIQAYV<br>SSKTM PDEQRQMGYMMMVISPIIMIIWISLSSASALGLYWSVSAAFLVVQTHFANIYY<br>EKVAKKEV QPFIEAYEREHNGGSNKKGKNTQVVSKKKKK |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                                                                                                        |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                                                                                                                                |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid                                                                                                                                                                                                                  |

repeated freeze-thaw cycles.

**Storage Buffer**

Tris/PBS-based buffer, 6% Trehalose, pH 8.0

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

**GENE INFORMATION****Gene Name**

yidC

**Synonyms**

yidC; SAB1974c; Membrane protein insertase YidC; Foldase YidC; Membrane integrase YidC; Membrane protein YidC

**UniProt ID**
