

# Recombinant Full Length Prochlorococcus Marinus Cytochrome B6-F Complex Iron-Sulfur Subunit(PetC) Protein, His-Tagged

**Cat. No.** RFL15763PF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                  |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Prochlorococcus marinus Cytochrome b6-f complex iron-sulfur subunit(petC) Protein (Q31C72) (1-178aa), fused to N-terminal His tag, was expressed in E. coli.             |
| <b>Species</b>          | Prochlorococcus marinus                                                                                                                                                                          |
| <b>Source</b>           | E.coli                                                                                                                                                                                           |
| <b>ProteinLength</b>    | Full Length (1-178)                                                                                                                                                                              |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                               |
| <b>AA Sequence</b>      | MTQLSSNDVPSMGRRQFMNLLTFGTATGVALGALYPVANYFMPLRAGGGGGGTSA<br>KDELG NPVTKTGWLATHQAGDRSLVQGLKGDPTYLIVNEGGEIGEFGLNAICTHLG<br>CVVPWDSGA NKFICPCHGSQYDTNGKVVRGPAPLSLALAHVDIEDDAVLVKQWSE<br>TDFRTNENPWWA |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                      |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                              |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid                                                                                                                |

repeated freeze-thaw cycles.

**Storage Buffer**

Tris/PBS-based buffer, 6% Trehalose, pH 8.0

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

## GENE INFORMATION

**Gene Name**

petC

**Synonyms**

petC; PMT9312\_0462; Cytochrome b6-f complex iron-sulfur subunit; Plastohydroquinone:plastocyanin oxidoreductase iron-sulfur protein; ISP; RISP; Rieske iron-sulfur protein

**UniProt ID**
