

# Recombinant Full Length Lasionycteris Noctivagans Cytochrome B(Mt-Cyb) Protein, His-Tagged

**Cat. No.** RFL5676LF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Lasionycteris noctivagans Cytochrome b(MT-CYB) Protein (Q33607) (1-176aa), fused to N-terminal His tag, was expressed in E. coli.                                      |
| <b>Species</b>          | Lasionycteris noctivagans (Silver-haired bat)                                                                                                                                                  |
| <b>Source</b>           | E.coli                                                                                                                                                                                         |
| <b>ProteinLength</b>    | Full Length (1-176)                                                                                                                                                                            |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                             |
| <b>AA Sequence</b>      | MTNIRKSHPLLKIINNSFIDLPAPSNISSWWNFGSLLGICLALQILTGIFLAMHYTSDTA<br>TAFNSVTHICRDVNYGWVRLRYLHANGASMFFICLYLHVGRGLYYGSYMYKETWNM<br>GVILL FAVMATAFMGYVLPWGQMSFWGATVITNLLSAIPYIGTDLVEWIWGGFSVDK<br>ATLT |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                    |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                            |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid repeated freeze-thaw cycles.                                                                                 |

|                       |                                             |
|-----------------------|---------------------------------------------|
| <b>Storage Buffer</b> | Tris/PBS-based buffer, 6% Trehalose, pH 8.0 |
|-----------------------|---------------------------------------------|

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

**GENE INFORMATION****Gene Name**

MT-CYB

**Synonyms**

MT-CYB; COB; CYTB; MTCYB; Cytochrome b; Complex III subunit 3; Complex III subunit III; Cytochrome b-c1 complex subunit 3; Ubiquinol-cytochrome-c reductase complex cytochrome b subunit; Fragment

**UniProt ID**[Q33607](#)
