

# Recombinant Full Length Dictyostelium Discoideum Probable 3-Beta-Hydroxysteroid-Delta(8),Delta(7)-Isomerase(Ebp) Protein, His-Tagged

**Cat. No.** RFL34846DF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                             |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Dictyostelium discoideum Probable 3-beta-hydroxysteroid-Delta(8),Delta(7)-isomerase(ebp) Protein (Q55E32) (1-219aa), fused to N-terminal His tag, was expressed in E. coli.                                         |
| <b>Species</b>          | Dictyostelium Discoideum                                                                                                                                                                                                                    |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                      |
| <b>ProteinLength</b>    | Full Length (1-219)                                                                                                                                                                                                                         |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                                                                          |
| <b>AA Sequence</b>      | MEIFAFVPLAVLTALCVVISLFFVKREKLVVFWLLWSGLIHIILEGSYGFFAHEVTKASTV<br>SFTEKMLELVPLENAWNPHWYAQLYSQYAKYDLRYAIQDPMVVFCCFLELVQGAAC<br>FLLV ICVIKQARIRHALQIFLCSIQGLGTVFYFITPYIYGLWEQQISSDPFELWVYVVG<br>L NGLW LLVPIILTIQSFIAINKQFSIVESTTKDAKFISRKPKTA |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                                                 |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                                                                         |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid                                                                                                                                                           |

repeated freeze-thaw cycles.

**Storage Buffer**

Tris/PBS-based buffer, 6% Trehalose, pH 8.0

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

## GENE INFORMATION

**Gene Name**

ebp

**Synonyms**

ebp; DDB\_G0269414; Probable 3-beta-hydroxysteroid-Delta(8,Delta(7-isomerase; Cholestenol Delta-isomerase; Delta(8-Delta(7 sterol isomerase; D8-D7 sterol isomerase; Emopamil-binding protein homolog

**UniProt ID**

[Q55E32](#)
