

# Recombinant Full Length Rickettsia Felis Atp Synthase Subunit C(AtpE) Protein, His-Tagged

Cat. No. RFL2746RF Lot. No. (See product label)

## SPECIFICATION

|                         |                                                                                                                                                         |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Rickettsia felis ATP synthase subunit c(atpE) Protein (Q4UNH9) (1-74aa), fused to N-terminal His tag, was expressed in E. coli. |
| <b>Species</b>          | Rickettsia felis                                                                                                                                        |
| <b>Source</b>           | E.coli                                                                                                                                                  |
| <b>ProteinLength</b>    | Full Length (1-74)                                                                                                                                      |
| <b>Form</b>             | Lyophilized powder                                                                                                                                      |
| <b>AA Sequence</b>      | MDMVSLKFIGIGLMAIGMYGAALGVSNIFSSLLSSIARNPSAAENLQRMALIGAGLAE<br>AM GLFSFVIAMLLIFS                                                                         |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                             |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                     |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid repeated freeze-thaw cycles.                                          |
| <b>Storage Buffer</b>   | Tris/PBS-based buffer, 6% Trehalose, pH 8.0                                                                                                             |

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

**GENE INFORMATION**

|                   |                                                                                                                                              |
|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>  | atpE                                                                                                                                         |
| <b>Synonyms</b>   | atpE; RF_0029; ATP synthase subunit c; ATP synthase F(0 sector subunit c; F-type ATPase subunit c; F-ATPase subunit c; Lipid-binding protein |
| <b>UniProt ID</b> | <a href="#">Q4UNH9</a>                                                                                                                       |
