

# Recombinant Full Length Pseudomonas Syringae Pv. Syringae Upf0059 Membrane Protein Psyr\_1725(Psyr\_1725) Protein, His-Tagged

**Cat. No.** RFL27237PF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Pseudomonas syringae pv. syringae UPF0059 membrane protein Psyr_1725(Psyr_1725) Protein (Q4ZVP9) (1-190aa), fused to N-terminal His tag, was expressed in E. coli.                     |
| <b>Species</b>          | Pseudomonas syringae pv. syringae                                                                                                                                                                              |
| <b>Source</b>           | E.coli                                                                                                                                                                                                         |
| <b>ProteinLength</b>    | Full Length (1-190)                                                                                                                                                                                            |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                                             |
| <b>AA Sequence</b>      | MNPISLLFLALAMSTDFAFAAALGKGASLHKPRFLEALRTGLIFGAJETITPVIGWGIGQV<br>AARFAESWDHWIAFTLLLVLGLHMIYNGIKHDDDEEQEKPGQHSFWILAVTAFATSID<br>AL AVGVGLAFVDVNIVVAALAIGLATTVMVTIGVMLGRVLGTMVGKRAEIIGGIVLIVV<br>GAT ILYEHL SAAQ |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                    |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                                            |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid                                                                                                                              |

repeated freeze-thaw cycles.

**Storage Buffer**

Tris/PBS-based buffer, 6% Trehalose, pH 8.0

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

**GENE INFORMATION****Gene Name**

mntP

**Synonyms**

mntP; Psyr\_1725; Putative manganese efflux pump MntP

**UniProt ID**
