| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                                                                                                                                                                                                                                         |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid repeated freeze-thaw cycles.                                                                                                                                                                                                                                                                                              |
| <b>Storage Buffer</b>   | Tris/PBS-based buffer, 6% Trehalose, pH 8.0                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Reconstitution</b>   | We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference. |
| <b>GENE INFORMATION</b> |                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Gene Name</b>        | aas                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>Synonyms</b>         | aas; ECA3641; Bifunctional protein Aas [Includes: 2-acylglycerophosphoethanolamine acyltransferase; 2-acyl-GPE acyltransferase; Acyl-[acyl-carrier-protein]--phospholipid O-acyltransferase; Acyl-[acyl-carrier-protein] synthetase; Acyl-ACP synthetase; Long-                                                                                                                                             |
| <b>UniProt ID</b>       | <a href="#">Q6D107</a>                                                                                                                                                                                                                                                                                                                                                                                      |
