

# Recombinant Full Length Human Transmembrane Protein 240(Tmem240) Protein, His-Tagged

**Cat. No.** RFL26899HF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                             |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Human Transmembrane protein 240(TM240) Protein (Q5SV17) (1-173aa), fused to N-terminal His tag, was expressed in E. coli.                                           |
| <b>Species</b>          | Human                                                                                                                                                                                       |
| <b>Source</b>           | E.coli                                                                                                                                                                                      |
| <b>ProteinLength</b>    | Full Length (1-173)                                                                                                                                                                         |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                          |
| <b>AA Sequence</b>      | MSMSANTMIFMILGASVVMIAIACLMNALLDRFHNYILPHLRGEDRVCHCNCGRH<br>HIHY VIPYDGDQSVVDASENYFVTDSVTKQEIDLMLGLLLGFCISWFLVWMDGVLHC<br>AVRAWRA GRRYDGSWTWLPKLC SLRELGRPHRPFEEAAGNMVHV KQKLYHNG<br>HPSPRHL |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                 |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                         |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid repeated freeze-thaw cycles.                                                                              |

|                       |                                             |
|-----------------------|---------------------------------------------|
| <b>Storage Buffer</b> | Tris/PBS-based buffer, 6% Trehalose, pH 8.0 |
|-----------------------|---------------------------------------------|

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

**GENE INFORMATION**

|                  |         |
|------------------|---------|
| <b>Gene Name</b> | TMEM240 |
|------------------|---------|

|                 |                                             |
|-----------------|---------------------------------------------|
| <b>Synonyms</b> | TMEM240; C1orf70; Transmembrane protein 240 |
|-----------------|---------------------------------------------|

|                   |                        |
