

## Recombinant Full Length *Erwinia Carotovora* Subsp. *Atroseptica* Protein Aaex(Aaex) Protein, His-Tagged

**Cat. No.** RFL29081PF    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                          |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length <i>Erwinia carotovora</i> subsp. <i>atroseptica</i> Protein AaeX(aaeX) Protein (Q6DAH6) (1-67aa), fused to N-terminal His tag, was expressed in <i>E. coli</i> . |
| <b>Species</b>          | <i>Pectobacterium atrosepticum</i>                                                                                                                                                       |
| <b>Source</b>           | <i>E.coli</i>                                                                                                                                                                            |
| <b>ProteinLength</b>    | Full Length (1-67)                                                                                                                                                                       |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                       |
| <b>AA Sequence</b>      | MSSLPVMVLFGLSFPPVFFVLMVSLTLFFVVRNLLQPTGIYDFVWHPALFNSALFCCLFY LLFRYGL                                                                                                                     |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                              |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                      |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid repeated freeze-thaw cycles.                                                                           |
| <b>Storage Buffer</b>   | Tris/PBS-based buffer, 6% Trehalose, pH 8.0                                                                                                                                              |

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

**GENE INFORMATION**

|            |                             |
|------------|-----------------------------|
| Gene Name  | aaeX                        |
| Synonyms   | aaeX; ECA0277; Protein AaeX |
| UniProt ID | <a href="#">Q6DAH6</a>      |
