

Active Recombinant Full Length Human JUP Protein, C-Flag-tagged

Cat. No. JUP-295HFL **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Full Length Human JUP Protein, fused to Flag-tag at C-terminus, was expressed in Mammalian cells.
Species	Human
Source	Mammalian Cells
Description	This gene encodes a major cytoplasmic protein which is the only known constituent common to submembranous plaques of both desmosomes and intermediate junctions. This protein forms distinct complexes with cadherins and desmosomal cadherins and is a member of the catenin family since it contains a distinct repeating amino acid motif called the armadillo repeat. Mutation in this gene has been associated with Naxos disease. Alternative splicing occurs in this gene; however, not all transcripts have been fully described.
Form	25 mM Tris HCl, pH 7.3, 100 mM glycine, 10% glycerol.
