

Recombinant Full Length Human EN2 Protein, C-Flag-tagged

Cat. No. EN2-604HFL **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Full Length Human EN2 Protein, fused to Flag-tag at C-terminus, was expressed in Mammalian cells.
Species	Human
Source	Mammalian Cells
Description	Homeobox-containing genes are thought to have a role in controlling development. In Drosophila, the 'engrailed' (en) gene plays an important role during development in segmentation, where it is required for the formation of posterior compartments. Different mutations in the mouse homologs, En1 and En2, produced different developmental defects that frequently are lethal. The human engrailed homologs 1 and 2 encode homeodomain-containing proteins and have been implicated in the control of pattern formation during development of the central nervous system.
Form	25 mM Tris HCl, pH 7.3, 100 mM glycine, 10% glycerol.
