

Recombinant Full Length Human PEA15 Protein, C-Flag-tagged

Cat. No. PEA15-2194HFL **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Full Length Human PEA15 Protein, fused to Flag-tag at C-terminus, was expressed in Mammalian cells.
Species	Human
Source	Mammalian Cells
Description	This gene encodes a death effector domain-containing protein that functions as a negative regulator of apoptosis. The encoded protein is an endogenous substrate for protein kinase C. This protein is also overexpressed in type 2 diabetes mellitus, where it may contribute to insulin resistance in glucose uptake. Alternative splicing results in multiple transcript variants.
