

## Recombinant Full Length Pan Paniscus Taste Receptor Type 2 Member 20(Tas2R20) Protein, His-Tagged

**Cat. No.** RFL19900PF    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                       |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Pan paniscus Taste receptor type 2 member 20(TAS2R20) Protein (Q646E3) (1-309aa), fused to N-terminal His tag, was expressed in E. coli.                                                                                                                                                                      |
| <b>Species</b>          | Pan paniscus                                                                                                                                                                                                                                                                                                                          |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                                                                                                |
| <b>ProteinLength</b>    | Full Length (1-309)                                                                                                                                                                                                                                                                                                                   |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                                                                                                                                                                    |
| <b>AA Sequence</b>      | MMSFLHIVFSILVVVAFILGNFANGFIALINFIWVKRQKISSADQIIAALAVSRVGLLW<br>VILLHWYSTVLNPTSSNLKVIFISNAWAVTNHFSIWLATSLSIFYLLKIVNFSRLIFHH L<br>KRKAKSVVLVIVLGSFLFLVCHLVMKNTYINVWTEECEGNVTWKIKLRNAMHLSNLTV<br>A MLANLIPFTLTLSFLLLIYSLCKHLKKMQLHGKGSQDPSTKIHIALQTVTSFLILLAI<br>YFLCLITSFWNSKMRPKEIVMLCQAFGIYPSFHSFILWGNKTLKQTFLSVLWQVTC<br>W AKGQNQSTP |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                                                                                                                                           |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                                                                                                                                                                   |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid                                                                                                                                                                                                                                                     |

repeated freeze-thaw cycles.

**Storage Buffer**

Tris/PBS-based buffer, 6% Trehalose, pH 8.0

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

## GENE INFORMATION

**Gene Name**

TAS2R20

**Synonyms**

TAS2R20; TAS2R49; Taste receptor type 2 member 20; Taste receptor type 2 member 49; T2R49

**UniProt ID**
